Methane Aerator System

Height	Diameter	Inlet/Outlet
6 ft.	30.5 Inch	Full 1 Inch

Blower	Tank
75 Cu. Ft. Per Min.	170 Gal.

MODEL AER01I-METH

[Installation is indoors due to Freezing Weather Conditions] Our Aeration Technology is Scientifically Engineered and Designed for the Removal of up to 99.9% of Methane Gas (CH4) from Well Water.

The Aeration Process (mixing of air and water) is the most effective technology for removing Methane Gas from well water. Aeration is a very natural process and environmentally green technology.

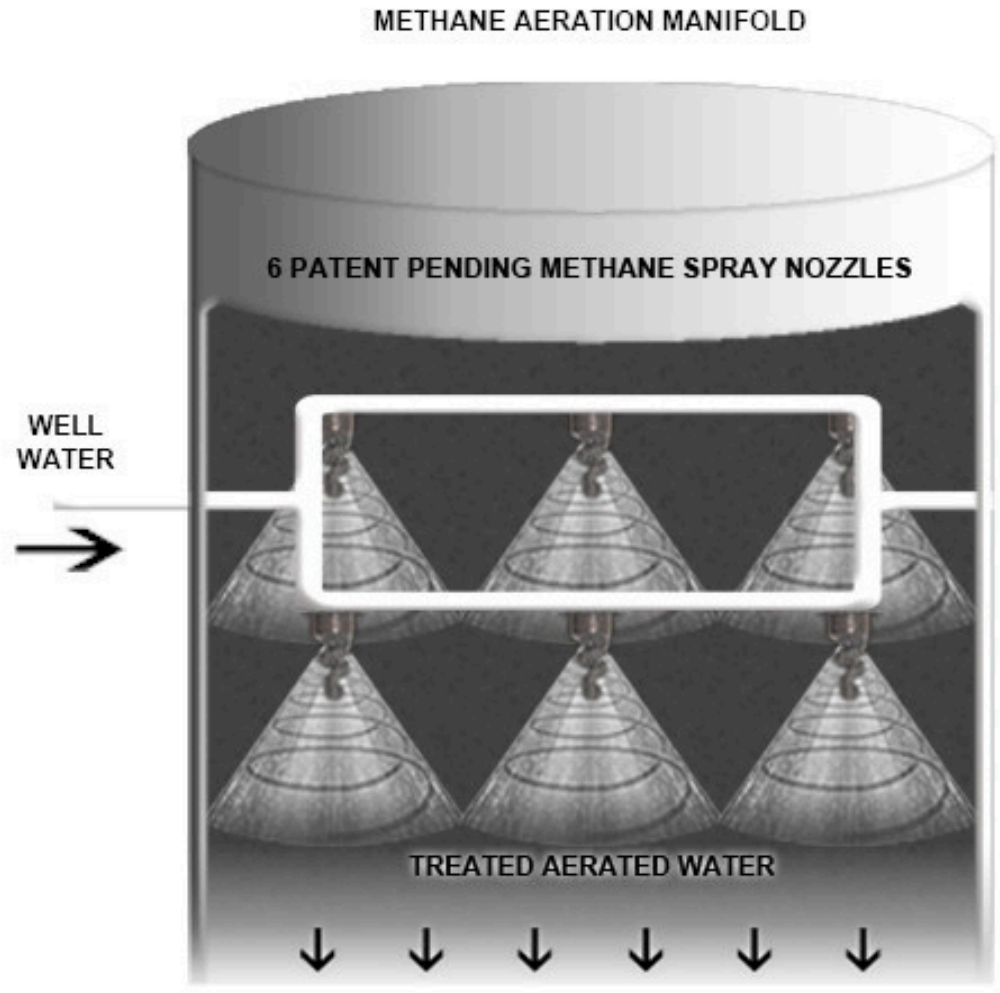
Advanced Aeration Solution

Water Refining Company

Technical Support 1-800-722-3212
(Until 10 pm ET)

- **Environmentally Green Technology**
- **Chemical Free**
- **FDA Approved (Food & Drug Administration)**
- **Polyethylene Customized Blow Molded Tank**
- **Fully Automatic**
- **Twist Top Accessibility**
- **1/2 H.P. Submersible Pump, 115-V or 220-V,**
- **Bladder Pressure Tank 22 Gal. Flexcon PC66FR**
- **Exhaust Blower System**
- **Automatic Refilling and Shut Off Controls Completely**
- **Assembled and Wired for Installation**
- **5 Year Limited Warranty on Aerator Tank**
- **Installation Instructions Included**

Unique Nozzle Technology



Rectangular Aeration Spray Manifold consisting of six (6) patent pending methane aeration nozzles.

NON-CLOGGING AERATION NOZZLE
PATENT PENDING

DOUBLE SPIRAL SPRAY

- (5) Five Spray Nozzles 4.2 GPM each Nozzle.
- Each aeration nozzle produces a spiral double cone of spray, a spiral inner cone of spray within a spiral outer cone of spray.
- This patent pending spray action doubles the aeration process.

How Does it Work?

Well water enters the Aerator Tank after your existing well pump and pressure tank. The six nozzle Aeration manifold scrubs, oxidizes, and aerates (mixing of air and water), and the Methane Gas is blown out via the Exhaust Blower System through a 3" PVC or similar pipe, and vented outside the home. The Methane Gas escapes into the atmosphere.

Also, installed vertically inside the Aerator Tank is a submersible pump needed to re-pressurize the water supplying the home or building. A companion pressure tank is included for the Aerator submersible pump. The System is fully automatic with automatic refilling and shutoff controls. Stops sputtering, water hammer, gurgling, fizzing of water from taps, milky look and swampy odor and taste.

No need for a huge storage cistern.

No need for a high pressure air bubbling aeration pump.

No monthly service.
