

Automatic Iron Filter

MODEL LGXTC (Greensand Plus)

(BACKWASH CYCLE AND REGENERATION CYCLE)

The "Regeneration Cycle" with Potassium recharges and restores the Greensand Plus Mineral Bed. This provides for a much longer, more efficient lifespan for the Iron Filter. The Regeneration Cycle follows the Backwash Cycle and is programmed for only once a week. The Model LGXTC is unlike other Iron Filters which require a Daily Back Washing and lack the Regeneration Cycle.

Includes FREE four position Noryl By-Pass Valve (\$88.00 value)

Your Smart Valve can now have a Smart Vortech® Tank Water Distribution System with Vortech® Upgrade add-on.

List Price: \$2,889.00

How Does it Work?

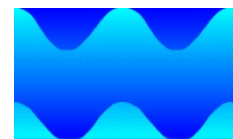

The LGX-TC fully Automatic Iron Filter removes both Ferrous (dissolved) and Ferric (suspended) Heavy Iron and Rust from well water. Eliminates brownish, orange and red iron stains, metallic taste and odor, and laundry iron problems. Removes manganese and moderate sulfur. Whole house system.

- This genuine 1 cu. ft. Greensand Plus mineral bed outperforms 2-3 times other mineral beds, such as filox, birm or pyrolux.
- Computerized solid state 1" Control Valve (Smart Valve)
- Low voltage 12V system
- Back-up Power Outage Protection
- Double Backwash feature
- Treated water Regenerant Refill
- Fiberglass mineral tank (gravel under bedding)
- Non-corrosive and rustproof
- Fully automatic
- Outdoor weatherproof valve cover available
- Written limited warranty
- Complete easy installation instructions
