- No Cartridges
- No Backwashing
- No Monthly Servicing

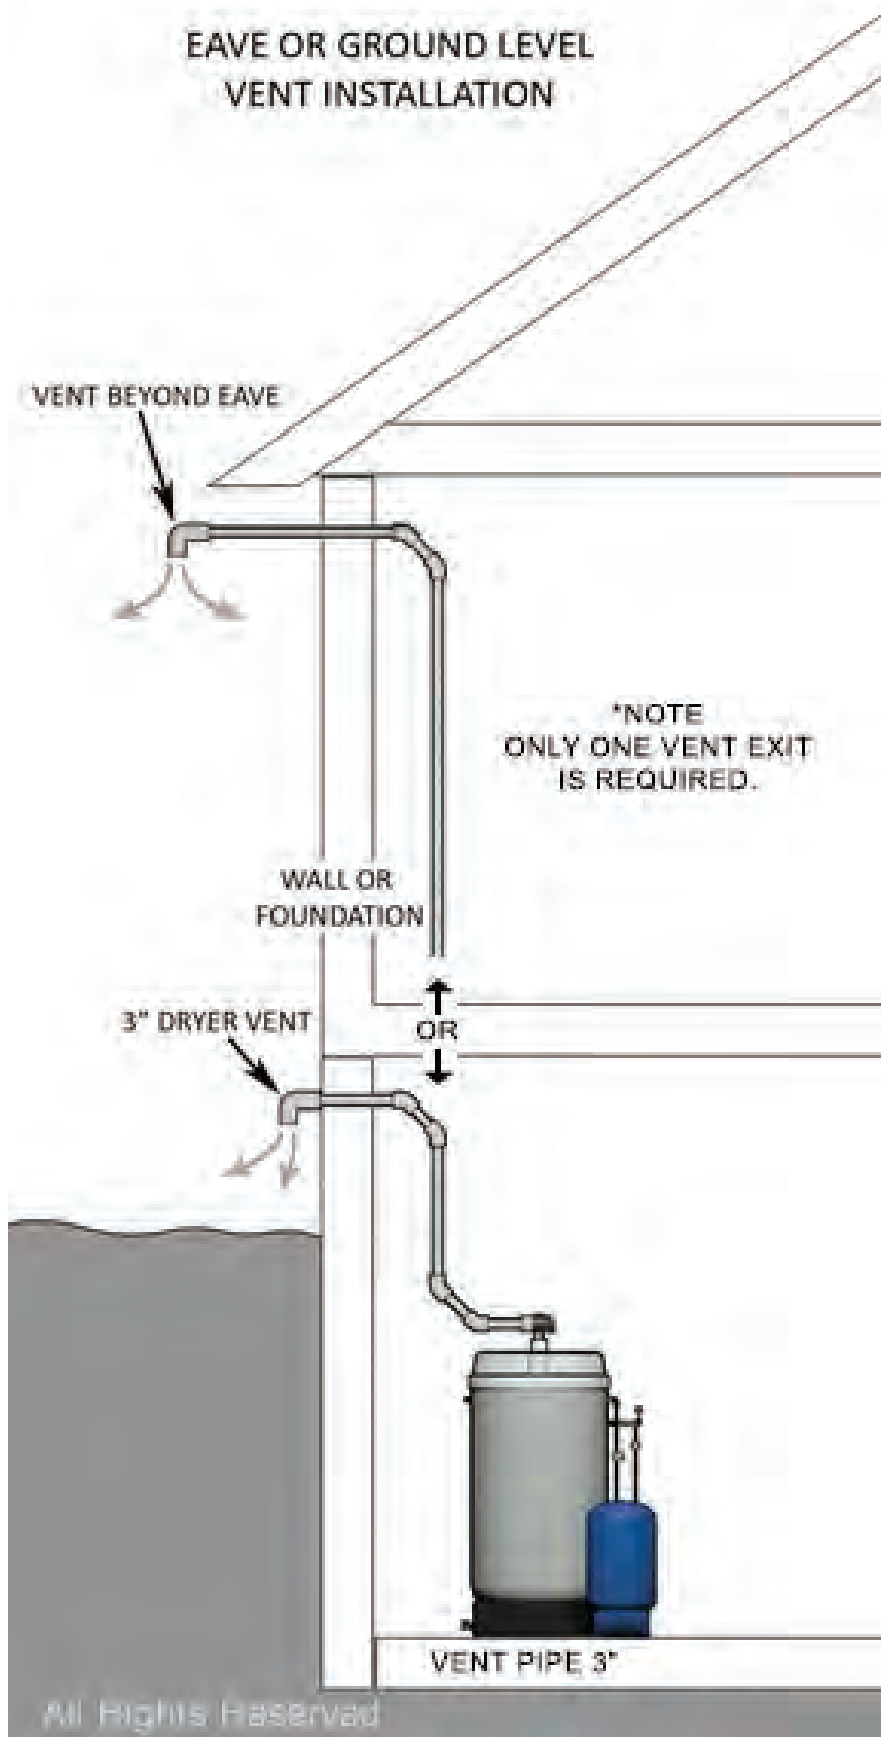

INDOOR SULFUR AERATOR SYSTEM

- Environmentally Green Technology
- Chemical Free
- FDA Approved (Food & Drug Administration)
- Polyethylene Customized Blow Molded Tank
- Fully Automatic
- Twist Top Accessibility
- 1/2 H.P. Submersible Pump, 115-v or 220-v

- Bladder Pressure Tank 22 Gal. Flexcon PC66FR
- Exhaust Blower System 3"
- Automatic Refilling and Shut-Off Controls
- Completely Assembled and Wired for Installation
- 5 Year Limited Warranty on Aerator Tank
- Installation Instructions Included

INDOOR SULFUR AERATOR SYSTEM

How does it work?

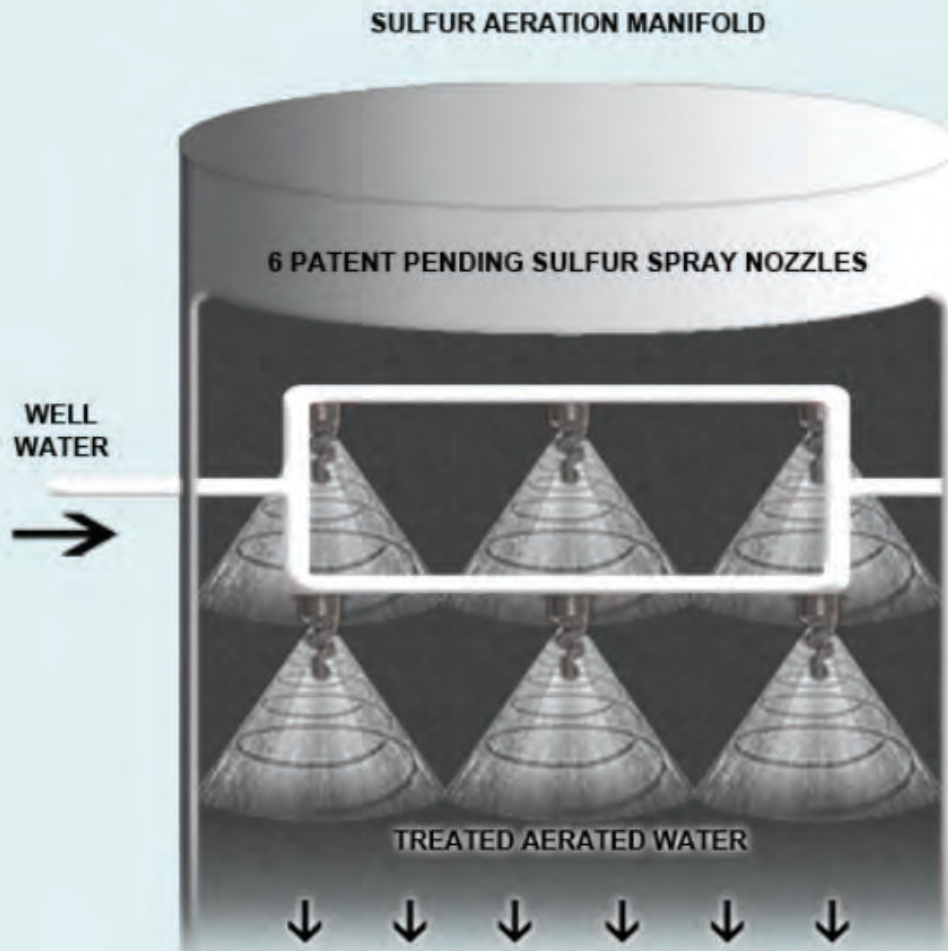

Sulfur Aeration Technology

It's chemical free. Well water enters the Aerator Tank after your existing well pump and pressure tank. The Aeration manifold scrubs, oxidizes, and aerates (mixing of air and water), and the Sulfur Gas is blown out via the Exhaust Blower System through a 3" PVC or similar pipe, and vented outside the home. The Sulfur Gas escapes into the atmosphere.

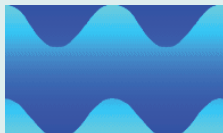

Also, installed vertically inside the Aerator Tank is a submersible pump needed to re-pressurize the water supplying the home or building. A companion pressure tank is included for the Aerator submersible pump.

The System is fully automatic with automatic refilling and shutoff controls
